**PURCHASES.**—The Society purchases Reversions and Remainders, whether absolute or contingent, Life Interests, whether in possession or deferred, and generally all Interests (in approved property) that depend upon the duration of human life.

**LOANS.**—The Society also grants Loans on the security of such Interests, either on ordinary Mortgage or by way of Reversionary Charge. The latter mode meets the convenience of borrowers who do not wish to make any payment for either principal or interest until their Reversionary Property falls into possession. The amount to which the Society will then be entitled is fixed at the outset, and does not depend on the time elapsing between the grant of the Loan and its repayment. The option of redeeming the Charge during the first three or five years can usually be combined with this form of Loan.

The operations of the Society not only enable future expectations to be turned into present cash on fair terms, but contingent Interests which may never come into possession at all are also made available for immediate uses.

The Board of Directors meet on Wednesdays at Four o'clock to consider proposals—forms for which and full information can be obtained at the Society's Offices—but immediate consideration will be given to business where despatch is of importance.
